

Dragonfly . Transformation of Karma

Evolution . Transformation . Protection

Online Intensive with Wim van Betuw . **28. September 2025** in Billerbeck

The dragonfly refers to an ancient legend in which dragons had magical powers; among other things, they gave light and wisdom, magic and illusion.

As the guardian of ancient knowledge, she brings the wisdom of the depths and the past, the power of development, of outgrowing oneself and the return of the old knowledge into a new cycle. Karmic patterns can still keep you stuck in duality, where deep fears, pain, grief and defense mechanisms block you.

Dragonfly offers us the chance to dissolve old karma and free ourselves from old attachments that no longer serve us. Her gift of shape-shifting and flying, as well as protection and power, allows us to follow our path and surrender to the transformation that comes with it.
